Executive Summary

Secure, Intelligent Infrastructure for the Global Creative Economy

Connecting creators, protecting IP, and powering AI-driven data intelligence across the creative ecosystem.

Q4 / October 2026

HOLLYWOOD STUDIOS

Hollywood Studios

Vision

Hollywood Studios™

Secure IP & AI infrastructure for the global creative economy.

A security-first platform where creators, executives, and institutions:

- Protect IP and securely leverage AI
- Collaborate with confidence
- Make smarter decisions with AI-powered intelligence & data-driven insights

Proprietary Patent-Pending Technology

Advance work from

creation → recognition → monetization

This is infrastructure, not a tool.

The Problem

Every day, creative IP is shared through PDFs and email, then fed into consumer AI platforms — putting ownership, control, exclusivity, and provenance at risk.

The Creative Economy Lacks Institutional Infrastructure

- Creative IP is exposed to consumer AI & loss of control after sharing
- Collaboration is fragmented
- Uncontrolled AI usage can create uncertainty around ownership, provenance and rights
- Creative decisions are often made without data-driven insights

AI has advanced.

Creative infrastructure has not.

Market Opportunity

Hollywood Studios is building secure AI infrastructure for the global creative economy, starting with Film, TV and Authors — the highest-value IP categories, before expanding into the broader creative economy.

The creative economy generates trillions in intellectual property and cultural value, yet operates on fragmented tools, insecure AI platforms, and disconnected networks.

$3+ Trillion
Annual Global Creative Economy

85+ Million
Creative Professionals

300+ Million Global Creators

Beachhead: Film, TV & Authors
25m+ Creators & Professionals
$850B+ Annual Industry Activity
$10B+ AI & Creative Infrastructure Opportunity

Compounding value

Relationships Drive Creation | Infrastructure Drives Scale

Hollywood Studios Platform

HollywoodStudios.ai

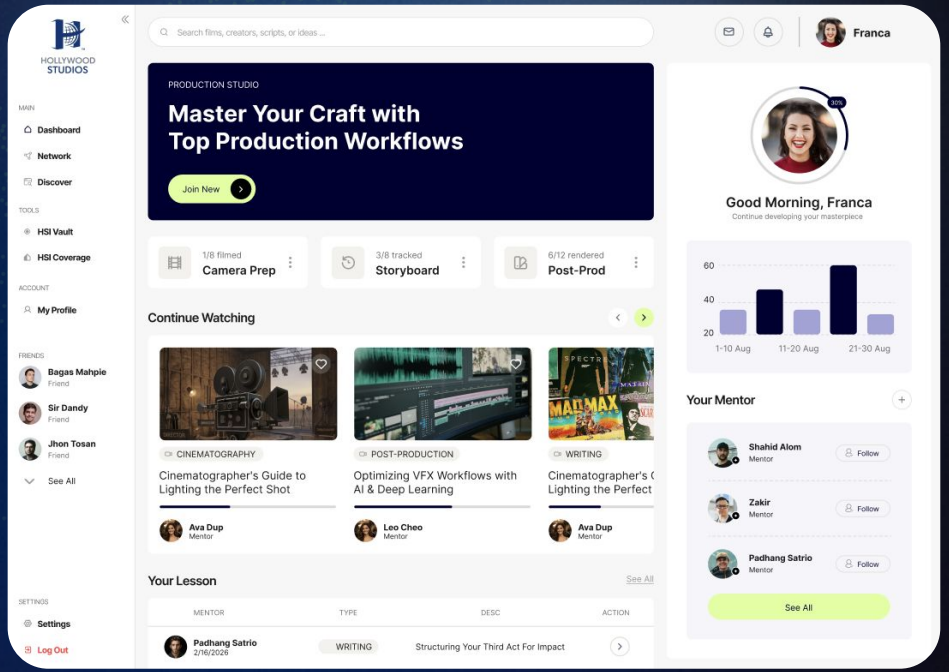

Powered by CreativeOS™

A security-first environment where creative work and capital converge.

- Designed for sensitive IP from day one
- Built-in provenance and auditability
- Modular architecture for tools and marketplaces
- 32,696 Titles - 65,536 Credits - 2,100 industry pages live

Permissioned Ecosystem Data Powering Proprietary AI Intelligence

This is the foundation everything runs on.

Hollywood Studios

CreativeOS

The Operating System for Creative IP

Vault

Blockchain-encrypted IP storage with permission-based read only access
Ownership and chain-of-title tracking

Secure & Inspire AI

Secure AI workspace for creative IP
Customer-controlled AI use and training permissions
AI Provenance tracking

Proprietary Patent-Pending Technology

Professional tools powered on the Hollywood Studios Platform

Hollywood Studios

CreativeOS

What Gets Created And Why?

Coverage - Analyze story & structure

Relativity - Compare historical success

Greenlight - Predict commercial potential

Proprietary, Patent-Pending Intelligence layer

CRG Intel™

Coverage → Relativity → Greenlight

From instinct → to intelligence

Oscar-Nominated ' Lone Survivor ' *Based on NY Times best selling book,* ***$154M Global Box Office*** *Executive Produced by Founder*

Hollywood Studios

Go-To-Market

Founder Node Activation

Creative Economy runs on relationships, not downloads.
Activation begins with a verified Founder Node.

Steven Saxton, seeded through industry projects:

- Lone Survivor
- Who Framed Roger Rabbit
- Breaking Bad
- Entourage

Each project represents a network of:

- Producers
- Writers
- Directors
- Cast
- Distributors
- Financiers

Activation Model

Step 1 - Founder Node Seeded
Creating the industry graph with 100,000+ pages already live.

Step 2 - Activate Industry Professionals
135 industry professionals on waitlist and in private beta preparing for launch

Step 3 - Activate Secure Project Workflows
Active projects currently in beta across CreativeOS

Step 4 - Drive Network Expansion
Users share projects and invite collaborators, organically expanding the network

This is not mass onboarding. This is credibility-driven network expansion

1 Founder Node → 100 Projects → 100,000+ Industry pages live→ Collaborator Activation → Institutional Network Effects.

Meet The Team
